

'HIBC' Dual Circuit Heating Jacket

Dual 1kW heating circuits and supply cables enable top and bottom of the jackets to be separately controlled. Standard product fits 4160mm to 4310mm circumference and 950mm height (other sizes are available to order). Optional insulating lid (improves warm up time) and heavy-duty waterproof cover (for external use) are available.

FEATURES

- 240v standard with 110v option.
- Needled Polyester Insulation.
- Silicone insulated spiral-wound resistance element.
- Electrical insulation doubled insulated for safety.
- Nylon based fabric.
- Non-standard sizes to order.

SPECIFICATION

- All HIBC heaters are supplied with 5 metres of power cable and fitted with either a -5° to +40° C or 0° to 90° C thermostat.
- 2 x 1 kW heating circuits and supply cables.
- 240v standard with 110v option.
- Standard product fits 4160mm to 4310mm circumference and 950mm height.
